Double the Capacity of Your Drill Press

The CARDINAL No. 18 SLO-DRIVE increases the capacity of common makes of Drill Presses by reducing spindle speeds to a range which will accommodate drills — and other tools — up to 1 inch in diameter, or larger. It is a standardized unit which is interchangeable on most popular makes of Drill Presses in the 18" to 20" size range. This attachment includes all the parts required for easy installation along with complete installation instructions.
