

Now you can put your
DELTA POWER TOOLS

On Wheels

Announcing: NEW LOW COST, EASY-TO-USE
RETRACTABLE CASTER SETS FOR DELTA TOOLS!

Now you can have a Delta workshop anywhere. Store your Delta Power Tools in a corner of the utility room, garage or basement, or even keep them in a closet! Roll them out when you use them—roll them back when you're finished.

Simple to use—no strain, no effort—even a woman could move the machines easily. They are easily retracted when the machine is in use, giving you the solidity and accuracy of a stationary machine.

When you put the one-motor **DELTA SHOP**
on wheels your entire basic shop becomes portable.

By adding the new retractable caster set to the Deltashop—the remarkable do-it-yourself one-motor combination of the most used power tools . . . saw, jointer, drill press and sander—you can have a complete workshop on wheels. Jobs such as building kitchen cabinets or built-in furniture, constructing a rumpus room or garage can now be done on location . . . simply move your complete one-motor shop to the job!

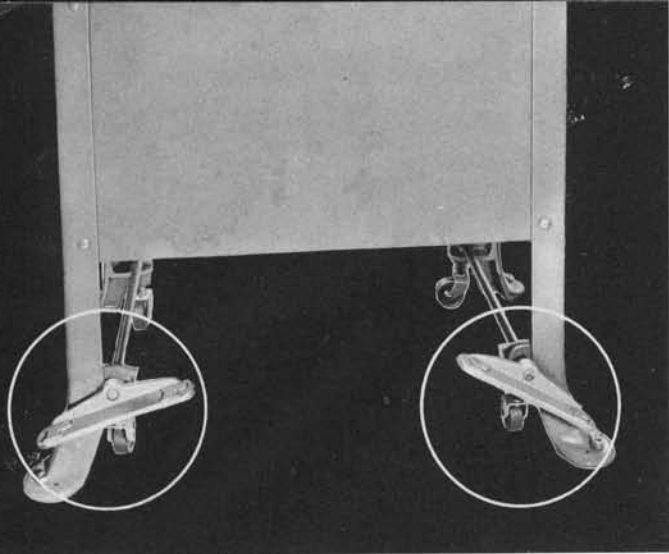

DELTA
MILWAUKEE

Easy to raise—just step down on lever. The stand and machine are easily raised, and you are "ready to roll."

Easy to lower—foot acts as brake, gently lowers stand and machine.

Delta Retractable Casters Are Applicable to Both Industry and Home

Delta retractable casters are applicable to many machines in the Delta line. They will prove excellent additions to machine stands in maintenance shops, schools, etc. With Delta retractable casters power tools become instantly portable—you can move machines from school shop to lecture room . . . set up temporary production lines . . . wheel machines for "on the spot" repair work . . . etc.

● **Delta Retractable casters are easy to install. Order by catalog number.**
