### TERMS AND CONDITIONS

<p><b>PRICES:</b> Prices in this catalog were effective at the time of printing. All prices and specifications are subject to change without notice. Errors are subject to correction.</p> <p><b>TERMS:</b> 2% 10 Days, Net 30, from date of invoice.</p> <p><b>NEW ACCTS:</b> Prepayment or COD until credit application approved by Prairie Tool Company.</p> <p><b>FREIGHT CHARGES:</b> All shipments are FOB Prairie du Chien, WI.</p> <p><b>DELIVERY:</b> UPS is the preferred carrier up to 100 pounds. Shipments over 70 lbs may be split in two cartons. Due to size and weight, orders may ship via freight carriers.</p> <p><b>WEIGHTS &amp; MEASURE:</b> All shipping weights listed are in pounds or fractions thereof and are estimated or approximate. Measurements in inches.</p> <p><b>WARRANTY:</b> All Prairie products are guaranteed to be free from defect in material and workmanship when used for their intended purpose. Careful inspection during manufacture and prior to shipment, assures that tools leave our factory in good condition.  However, in cases where defect is claimed, the tool must be returned to the factory with transportation charges prepaid. Careful inspection will then be made and if the tool is then found defective, it will be repaired or replaced free of charge.</p>	<p><b>SHORTAGES:</b> The consignee must file all claims for transportation damage and/or loss.</p> <p><b>RETURNED GOODS:</b> No goods will be returned to the factory without prior authorization. All transportation charges must be prepaid, with a minimum handling charge of 15% except on defective merchandise.</p> <p><b>TAX:</b> If under the law now or hereafter passed, we are required to a tax on sales, prices quoted will be increased by the amount of such tax.</p> <p><b>SMALL ORDERS:</b> A minimum of \$500.00 at the suggested list prices is required for an order to receive Distributor Net Prices as shown. Orders for less than \$500.00 to \$250.00 will be invoiced at the suggested list less 44%. Orders under \$250.00 will be invoiced at the suggested list prices less 33%. No discount on orders less than \$100.00</p> <p><b>VOLUME DISCOUNT:</b> Purchases of \$1000.00 or more will receive a 2% discount. Purchases of \$1500.00 or more, will receive a discount of 5%. These discounts are only available if account is paid within 30 days of invoice date.</p> <p><b>SALES AIDS:</b> We have available for you or your customer, line drawings, Price List Pages, and complete Price Lists.</p> <p><b>POSSESSION OF THIS PRICE LIST:</b> Possession of this price list in no way obligates Prairie Tool Company Inc., to sell or service the holder.</p>

## PROVIDING OVER 80 YEARS OF SERVICE TO THE HARDWARE INDUSTRY

“Since 1920 Prairie Tool Company has been manufacturing quality tools for the hardware industry. Originally named the Prairie du Chien Tool Company, named for the town in which the factory was located, the company today is still nestled between the bluffs of the Mississippi, in Southwest Wisconsin. Since the founding of the company, the main focus has been that of abrasive products. Some of the first products produced were manufactured with the vast knowledge of gear hobbing, or gear machining. The result of this knowledge was that of human powered grinding equipment. Because of the lack of electricity available in rural areas, especially farms, hand or foot powered grinders were the solution to the abrasive needs of consumers. These grinders were extremely popular, leading to a vast line of versatile grinders, from small hand powered wet grinders, to large high-speed foot powered grinders.

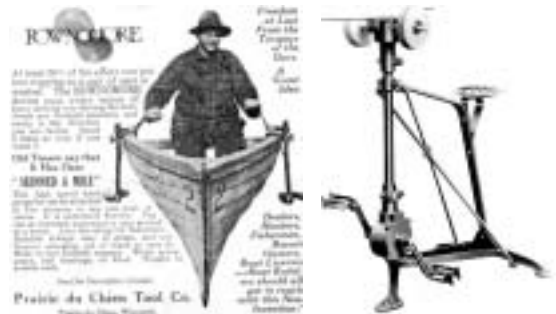

In 1920 Laurence Swingle acquired the Prairie Tool Company. During a difficult time period in the American economy, he continued to manufacture quality abrasive products, while employing a vast percentage of the surrounding area. With the advent of World War II in the 1940’s, Prairie Tool, as well as most other industrial companies, started to support the US war effort. Thousands of hand-powered grinders were sent across seas to our men and women to assist them in their needs. They worked perfectly in areas that were without power, on battlefields, on land bases, and on makeshift airfields. Still, today, because of the mobility needs of our military, Prairie Tool still provides hand powered grinders and hydraulic hose cutters to the US Department of Defense. The only known manufacturer of hand grinders in the US today is Prairie Tool.

In 1950 Laurence Swingle’s nephew, William Herreid, took over ownership, and as President, took Prairie Tool into its greatest years of manufacturing the company had ever seen. Some of the first steps were the modernization of the machinery throughout the plant, as well as increased warehousing and assembly areas. The advent of great distributors such as Grainger and McMaster, led to a diverse market and product offering now being provided to consumers. To take advantage of this growing market, Prairie Tool continued to increase its product offering. These new products included a new wet grinder line for the cool and smooth sharpening of products that required a fine and sharp edge. Also a new grinding wheel dresser, which would resurface the worn faces of all types of grinding wheels, increasing usability, and extending wheel life.

In 1998, for the first time ever, Prairie Tool moved its location to a new modern facility just a few miles north of town. This new plant addressed the issues of capacity, safety, and quality now needed for a modern manufacturing facility. With a new factory came new office facilities, warehousing and storage areas, as well as multiple loading and shipping docks needed to deliver the large amount of abrasive products sent each day.

Now, 80 years since the founding of the company, Prairie Tool is still family owned and operated. Our endeavor to manufacture 100% American made, quality abrasive products has not changed. Prairie Tool is now committed to manufacturing new abrasive products, which will be unlike anything else produced in the world. Look for these new products in the coming months and remember to call on the Prairie Tool Company to supply your entire abrasive product needs.”

Matt J. Hagen  
General Manager

## TOP 10 BEST SELLING ITEMS OF 2001

### TOP 10 LIST

Place	Item Number and Description	Page
1.	# 600 Grinding Wheel Dresser	8

Throughout this catalog you will also find many **NEW** items. These indicate any **NEW** items that have been manufactured by the Prairie Tool Company since the previous catalog. Some of these items are improvements or accessories on current products that were previously available. Other items, however, are completely **NEW**. In all, there are 17 **NEW** products in this 2002 catalog. Our goal to provide **NEW** metal working tools will soon provide a wide variety of **NEW** products in the coming months. Please look to the next page for two **NEW** product highlights, and in-depth information on them.

## #700 GRINDING WHEEL DRESSER

**Renews grinding wheels to their previous, like new condition.  
For the reconditioning of all bench type grinding wheels.**

No. 700 background, pictured along with No. 600 foreground.

**If you buy, sell, stock, or supply grinding wheels,  
this grinding wheel dresser is a must have!**

**100% Made in the USA!**

**Listed on Page 8, Net Price: \$7.55**

After periods of use, grinding wheels become worn and lose much of their effectiveness. They may be irregular from long periods of hard grinding, or glazed from soft materials like aluminum or plastic. In any case, the grinding wheel is worthless if it will not work properly. This Grinding Wheel Dresser renews grinding wheels by removing a small layer of the wheel, providing a new and true cutting surface. Grinding wheels can be reconditioned many times to extend the operating life of the grinding wheel, ease operation, and increase operator safety.

### Specifications

1" cutting face, effective for grinding wheels up to 3" in width. Cutters have 1-1/2" diameter, and 1/2" through hole, along with bushing and 1/4" pin. Hardened steel bushing and pin provide smooth operation and longer life than other wheel dressers with just pins. Housing is cast aluminum for high strength and low weight. Fully enclosed cutters direct material down and away from operator and increase operator safety unlike other open hood dressers. No. 00 Replacement kit with cutters, bushing, and pin is available. Display packed for individual sale.

## #A3 CAST IRON ANVIL

**The perfect anvil for any workshop,  
whether you're a blacksmith or hobbyist.**

No. A3 is pictured along with smaller No. A1

**This high quality anvil is an unbelievable value,  
and its 100% Made in the USA!**

**Listed on Page 16, Net Price: \$32.00**

The A3 is an identical copy of the smaller and popular A1. At 55 lbs, the A3 is the largest anvil ever produced by the Prairie Tool Company. The substantial weight and size make many customers think of the A3 as a tool for professionals only. However, the low price allows the customers to have a large high quality anvil in their own home workshop. The horn allows for metal to be contoured into various shapes, while the though-hole provides a point from which to bend round stock. Also, four mounting feet allow the anvil to be bolted down to a stable work surface. The A3 anvil is painted with a rustproof flat black paint, and then ground and polished to a brilliant shine. Many stores have set up shelves with both anvils side by side, making for an interesting display and fitting in well next to current vise displays.

### Specifications

Cast from solid ASTM class 20 gray iron. Ground and polished.

Height 7" Length 14 1/2" Width 3 3/4"

Work Face 9" x 4"

Weight 55 lbs

• Complete 2' Metal Working Assortment • Packaging For High Consumer Appeal • Low Initial Investment • Up To 62% Margin On Most Items •
