

This tool cabinet was especially designed to provide proper storage space for the various accessory units normally used with each toolroom lathe. Made entirely of steel, this tool cabinet is 24" wide, 20" deep and 41" high. Space is provided in the top drawer for the storage of collets. Storage space is provided in the bottom of cabinet for such accessories as chucks, steady rest, follow rest, face plate, relieving attachment, as well as change gears for the relieving attachment.

Locks are provided for this cabinet. Its top serves as a convenient place for the operator's personal tool box.

### TOOL CABINET FOR 10" LATHES

This tool cabinet was designed especially for holding the accessories for use with the 10" x 20" Monarch Sensitive Precision Toolmaker's lathe, 10" Manufacturing and 10" Turret lathes. The revolving collet racks hold all the collets required and the operator may use the top of the cabinet as a place for his own tool chest.
