general safety instructions for power tools

1. KNOW YOUR POWER TOOL

Read the owner's manual carefully. Learn its application and limitations as well as the specific potential hazards peculiar to this tool.

2. GROUND ALL TOOLS

This tool is equipped with an approved 3-conductor cord and a 3-prong grounding type plug to fit the proper grounding type receptacle. The green conductor in the cord is the grounding wire. Never connect the green wire to a live terminal.

3. KEEP GUARDS IN PLACE

in working order, and in proper adjustment and alignment.

4. REMOVE ADJUSTING KEYS AND WRENCHES

Form habit of checking to see that keys and adjusting wrenches are removed from tool before turning it on.

5. KEEP WORK AREA CLEAN

Cluttered areas and benches invite accidents. Floor must not be slippery due to wax or sawdust.

6. AVOID DANGEROUS ENVIRONMENT

Don't use power tools in damp or wet locations or expose them to rain. Keep work area well lighted. Provide adequate surrounding work space.

7. KEEP CHILDREN AWAY

All visitors should be kept a safe distance from work area.

8. MAKE WORKSHOP KID-PROOF

— with padlocks, master switches, or by removing starter keys.

9. DON'T FORCE TOOL

It will do the job better and safer at the rate for which it was designed.

10. USE RIGHT TOOL

Don't force tool or attachment to do a job it was not designed for.

11. WEAR PROPER APPAREL

Do not wear loose clothing, gloves, neckties or jewelry (rings, wrist watches) to get caught in moving parts. Nonslip footwear is recommended. Wear protective hair covering to contain long hair. Roll long sleeves above the elbow.

12. USE SAFETY GOGGLES (Head Protection)

Wear Safety goggles (must comply with ANSI Z87.1) at all times. Also, use face or dust mask if cutting operation is dusty, and ear protectors (plugs or muffs) during extended periods of operation.

13. SECURE WORK

Use clamps or a vise to hold work when practical. It's safer than using your hand, frees both hands to operate tool.

14. DON'T OVERREACH

Keep proper footing and balance at all times.

15. MAINTAIN TOOLS WITH CARE

Keep tools sharp and clean for best and safest performance. Follow instructions for lubricating and changing accessories.

16. DISCONNECT TOOLS

before servicing; when changing accessories such as blades, bits, cutters, etc.

17. AVOID ACCIDENTAL STARTING

Make sure switch is in "OFF" position before plugging in.

18. USE RECOMMENDED ACCESSORIES

Consult the owner's manual for recommended accessories. Follow the instructions that accompany the accessories. The use of improper accessories may cause hazards.

19. NEVER STAND ON TOOL

Serious injury could occur if the tool is tipped or if the cutting tool is accidentally contacted.

Do not store materials above or near the tool such that it is necessary to stand on the tool to reach them.

20. CHECK DAMAGED PARTS

Before further use of the tool, a guard or other part that is damaged should be carefully checked to ensure that it will operate properly and perform its intended function. Check for alignment of moving parts, binding of moving parts, breakage of parts, mounting, and any other conditions that may affect its operation. A guard or other part that is damaged should be properly repaired or replaced.

21. DIRECTION OF FEED

Feed work into a blade or cutter against the direction of rotation of the blade or cutter only.

22. NEVER LEAVE TOOL RUNNING UNATTENDED

Turn power off. Don't leave tool until it comes to a complete stop.

ADDITIONAL SAFETY INSTRUCTIONS FOR SANDER/GRINDER

WARNING: FOR YOUR OWN SAFETY, DO NOT ATTEMPT TO OPERATE YOUR SANDER/GRINDER UNTIL IT IS COMPLETELY ASSEMBLED ACCORDING TO THE INSTRUCTIONS, AND THAT YOU UNDERSTAND THE FOLLOWING (SEE CONTENTS... PAGE 3.)

1. General safety Instructions for Power Tools (Page 2)
2. Getting to Know Your Sander/Grinder (Page 5)
3. Basic Sander/Grinder Operations (Page 6)
4. Maintenance (Page 8)
5. **Power Source Outlet.** This tool should be grounded while in use to protect the operator from electric shock.
See "Motor Specifications and Electrical Requirements" section further on in this manual.
6. **Support Workpiece.** Maintain control of workpiece at all times.
7. **Do Not Wet Grind or Polish.** Never use a steady stream of water on the workpiece. Only quench the workpiece in water to cool it.

8. **Do Not Grind or Polish Magnesium . . .** because it could catch on fire.
9. **Note and follow Safety Instructions that appear on the belt guard.**

10. **THINK SAFETY:** Safety is a combination of operator common sense and alertness at all times when the Sander/Grinder is being used.

WARNING: DO NOT ALLOW FAMILIARITY (GAINED FROM FREQUENT USE OF YOUR SANDER/GRINDER) TO BECOME COMMONPLACE. ALWAYS REMEMBER THAT A CARELESS FRACTION OF A SECOND IS SUFFICIENT TO INFLICT SEVERE INJURY.

The operation of any power tool can result in foreign objects being thrown into the eyes, which can result in severe eye damage. Always wear safety goggles complying with ANSI Z87.1 (shown on Package) before commencing power tool operation. Safety Goggles are available at Sears retail or catalog stores.

TOOLS NEEDED

9/16 INCH WRENCH

COMBINATION SQUARE

MOTOR SPECIFICATIONS AND ELECTRICAL REQUIREMENTS

MOTOR SPECIFICATIONS

The AC motor is a Split Phase non-reversible type, with the following specifications:

Horsepower	1/3
Voltage	115
Amperes6
Hertz	60
Phase	Single
RPM	1725
Rotation (viewed from Pulley end)	clockwise
Abrasive Belt Speed (Feet Per Min.) Approx.	3000

Although the motor is designed for operation on the voltage and frequency specified on motor nameplate, normal loads will be handled safely on voltages not more than 10% above or below the nameplate voltage. Heavy loads, however, require that voltage at motor terminals be not less than the voltage specified on nameplate.

CONNECTING TO POWER SOURCE OUTLET

This Sander/Grinder must be grounded while in use to protect the operator from electrical shock.

If power cord is worn or cut, or damaged in any way, have it replaced immediately.

If your Sander/Grinder is for use on less than 150 volts it has a plug that looks like below.

Plug power cord into 110-120V properly grounded type outlet protected by a 15-amp. time delay or Circuit-Saver fuse or circuit breaker.

IF YOU ARE NOT SURE THAT YOUR OUTLET IS PROPERLY GROUNDED, HAVE IT CHECKED BY A QUALIFIED ELECTRICIAN.

WARNING: DO NOT PERMIT FINGERS TO TOUCH THE TERMINALS OF PLUG WHEN INSTALLING OR REMOVING THE PLUG TO OR FROM THE OUTLET.

WARNING: IF NOT PROPERLY GROUNDED THIS POWER TOOL CAN INCUR THE POTENTIAL HAZARD OF ELECTRICAL SHOCK, PARTICULARLY WHEN USED IN DAMP LOCATIONS, IN PROXIMITY TO PLUMBING, OR OUT OF DOORS. IF AN ELECTRICAL SHOCK OCCURS THERE IS THE POTENTIAL OF A SECONDARY HAZARD SUCH AS YOUR HANDS CONTACTING THE ABRASIVE BELT OR DISC.

This Sander/Grinder is equipped with a 3-conductor cord and grounding type plug which has a grounding prong, approved by Underwriters' Laboratories and the Canadian Standards Association. The ground conductor has a green lug and is attached to the tool housing at one end and to the ground prong in the attachment plug at the other end.

This plug requires a mating 3-conductor grounded type outlet as shown.

If the outlet you are planning to use for this Sander/Grinder is of the two prong type **DO NOT REMOVE OR ALTER THE GROUNDING PRONG IN ANY MANNER.** Use an adapter as shown and always connect the grounding lug to a known ground.

It is recommended that you have a qualified electrician replace the TWO prong outlet with a properly grounded THREE prong outlet.

An adapter as shown below is available for connecting plugs to 2-prong receptacles. The green grounding lug extending from the adapter must be connected to a permanent ground such as to a properly grounded outlet box.

NOTE: The adapter illustrated is for use only if you already have a properly grounded 2-prong receptacle. Adapter is not allowed in Canada by the Canadian Electrical Code.

The use of any extension cord will cause some loss of power. To keep this to a minimum and to prevent over-heating and motor burn-out, use the table below to determine the minimum wire size (A.W.G.) extension cord. Use only 3 wire extension cords which have 3 prong grounding type plugs and 3-pole receptacles which will accept the plug on the Sander/Grinder.

Extension Cord Length	Wire Size A.W.G.
Up to 100 Ft.	16
100-200 Ft.	14
200-400 Ft.	10

ASSEMBLY

Your Craftsman Sander/Grinder is shipped complete including the motor. The Disc Sanding attachment and Miter Gauge are optional accessories.

WARNING: FOR YOUR OWN SAFETY, NEVER CONNECT PLUG TO POWER SOURCE OUTLET UNTIL ALL ASSEMBLY STEPS ARE COMPLETED.

The top arm is spring loaded and held down for shipping purposes with a piece of cord. Hold down against spring pressure on the arm, remove the cord and ease up on the arm.

Apply a coat of automobile wax to the table.

Wipe all parts thoroughly with a clean, dry cloth.

INSTALLING ABRASIVE BELT

Your Sander/Grinder is shipped with the abrasive belt installed. When replacing belts, notice directional arrow → on inside of belt . . . it must point downward on the front section of the belt when installed.

1. Remove both upper and lower belt guards by removing the three (3) wing screws which secure the guards.
2. Push down on arm and position belt over upper and lower wheels and rear idler.
3. Using a 9/16 inch wrench, loosen TABLE LOCKNUT . . . swing table upwards and move it as close to the belt without touching it.
4. Using an accurate square adjust table 90° to belt . . .

TRACKING BELT

CAUTION: Remove both upper and lower guard. Sanding belt may cut into guard prior to final tracking.

1. Turn motor "ON". Belt should be running in center of upper wheel.
2. If it runs toward the right or left side of the wheel, loosen screw "A" using 3/16" set screw wrench furnished with your Sander/Grinder.
3. Turn screw "B" with Hex wrench and notice belt move sideways. Turn screw right or left until belt is running in center of wheel.
4. Tighten screw "A".
5. If belt touches edges of table, loosen TABLE ADJUSTING SCREWS and reposition table.
6. Belt should be even with edges of platen if it is not, loosen screws holding platen and adjust it.
7. Replace "Upper" and "Lower" Guards.

GETTING TO KNOW YOUR SANDER/GRINDER

TABLE LOCK NUT locks table in place. Use a square or protractor to adjust table to desired angle to belt.

TRACKING SCREWS are adjusted to track belt.

BASIC SANDER/GRINDER OPERATIONS

We recommend the following instructions for operating your Sander/Grinder so that you get the best results and to minimize personal injury.

WARNING: FOR YOUR OWN SAFETY, ALWAYS OBSERVE THE FOLLOWING SAFETY PRECAUTIONS.

1. Make sure Table Lock Nut is always tight.
2. Remove plug from power source outlet when adjusting table, changing belts, or removing or adjusting platen.
3. After turning switch ON, always allow the belt to come up to full speed before sanding or grinding.
4. Make sure belt always tracks properly. Push the workpiece or cutting tool gently against the belt . . . allowing the belt to cut without reducing the belt speed appreciably or stalling the motor.
5. Keep your hands clear of the belt.
6. Replace belts when they become loaded (glazed) or frayed.

SANDING WOOD OR PLASTICS

Move the workpiece across the belt.

GRINDING METAL

Move the workpiece across the belt.

If the workpiece becomes too hot to handle, **quench it in cold water.**

Never push a sharp corner of the workpiece **rapidly against the belt** because the belt could tear.

INSIDE WORK

WARNING: FOR YOUR OWN SAFETY, REMOVE PLUG FROM POWER SOURCE OUTLET.

1. Remove both "Upper" and "Lower" guards.
2. Loosen wing nut and position guard back as shown.
3. Remove the "Hairpin Clip" which retains the rear idler. Use a pair of long nose pliers.
4. Remove washer and idler, and position them on shaft underneath table; replace clip.
5. Position belt over lower wheel and under idler. Thread belt through opening in workpiece.

6. Push down on arm and position belt around upper idler and over upper wheel.
7. Make sure upper idler is positioned so that it causes belt to run against platen.
8. It can be adjusted by loosening nut "A" and repositioning idler arm.
9. Replace "Upper" and "Lower" guards.
10. Position guard back and tighten wing nut.
11. Follow same procedure for Sanding or Grinding.

SHARPENING

1. Adjust table to proper angular position for intended operation. Lock securely.
2. When sharpening short cutting tools such as wood chisels, it will be necessary to clamp a piece of wood to the table.
3. Sand a notch on the back of the wood so that the top corner is close to the belt.
4. Move the cutting tool across the belt, pushing on it gently so that it does not burn.
5. Frequently quench the cutting tool in water to keep it cool.

POLISHING

1. Remove platen and adjust upper idler as shown or swing it to the rear.
2. Push the workpiece against the belt . . . move it gently so that the belt does not come off the wheels.
3. If the workpiece is metal, frequently quench it in water to keep it cool and prevent it from burning.

MAINTENANCE

WARNING: REMOVE PLUG FROM POWER SOURCE OUTLET BEFORE MAINTAINING OR LUBRICATING YOUR SANDER/GRINDER.

Keep the Sander/Grinder and motor clean. Frequently blow out dust and chips.

LUBRICATION

The upper and lower wheels run on ball bearings which are permanently lubricated. They require no further lubrication.

The idlers contain bronze bearings. Occasionally apply a few drops of light machine oil.

RECOMMENDED ACCESSORIES

DISC SANDING ATTACHMENT	9-22563
MITER GAUGE (FOR USE WITH 9-22563)	9-22574
ABRASIVE BELTS 1" x 42"	
FINE	9-26056
MEDIUM	9-26055
COARSE	9-26054

STEEL STAND	9-22219
POWER TOOL KNOW HOW "HANDBOOKS"	
TABLE SAW	9-2918
RADIAL SAW	9-2917

The above recommended accessories are current and were available at the time this manual was printed.

TROUBLE SHOOTING

WARNING: FOR YOUR OWN SAFETY, ALWAYS REMOVE PLUG FROM POWER SOURCE OUTLET BEFORE TROUBLE SHOOTING.

Any attempt to repair the motor may create a hazard unless repair is done by qualified service technician. Repair service is available at your nearest Sears Store.

TROUBLE	PROBABLE CAUSE	SUGGESTED REMEDY
Motor will not start.	<ol style="list-style-type: none"> 1. Low voltage. 2. Open circuit in motor or loose connections. 	<ol style="list-style-type: none"> 1. Check power line for proper voltage. 2. Inspect all lead terminations on motor for loose or open connection.
Motor will not start, fuses or circuit breakers "blow".	<ol style="list-style-type: none"> 1. Short circuit in line, cord or plug. 2. Short circuit in motor or loose connections. 3. HOW TO ORDER REPAIR PARTS

1 INCH SANDER GRINDER

Now that you have purchased your 1-inch sander grinder, should a need ever exist for repair or service, simply contact any Sears Service Center and most Sears, Roebuck and Co. stores. Be sure to provide all pertinent facts when you call or visit.

The model number of your 1-inch sander grinder will be found on the side of the base.

WHEN ORDERING REPAIR PARTS, ALWAYS GIVE THE FOLLOWING INFORMATION:

PART NUMBER

PART DESCRIPTION

MODEL NUMBER
113.22560

NAME OF ITEM
1-INCH SANDER GRINDER

All parts listed may be ordered from any Sears Service Center and most Sears stores. If the parts you need are not stocked locally, your order will be electronically transmitted to a Sears Repair Parts Distribution Center for handling.

Sold by SEARS, ROEBUCK AND CO., Chicago, IL. 60684 U.S.A.
