# 10" FLOOR MODEL TILTING ARBOR SAW

The ideal saw for the contractor or factory, or the more elaborate home shop. Heavy cast construction plus ball bearings gives this saw long life and accuracy. This saw, with its large table and sturdy base, can be moved wherever needed right to the job. The arbor tilts to 45° and the table always remains level. The built-in motor mount holds motor and tilts with arbor preventing belt twist and wear. Compare this saw with any on the market and you'll agree it's the finest. (TA-1200.) Accessories for this tool pictured on Page 5.

## S P E C I F I C A T I O N S

Depth of Cut.....	3½"
Total Height.....	44"
Blade Tilts to.....	45°
Bearings.....	2 Sealed-for-Life Ball Bearings
Recommended Motor (Not included).....	¾ HP
Arbor Pulley.....	2"
Recommended Motor Pulley.....	5"
Weight.....	90 lbs.
Complete with Stand, Combination Blade, Rip Fence, Mitre Gauge, Saw Guard and Anti-Kickback, V-Belt and 5" Motor Pulley.	

# 8" TILTING ARBOR BENCH SAW

This 8" Tilting Arbor Saw (TA-900) is heavy and rugged in construction. The table always remains level and the blade tilts. This gives new ease of operation. The blade tilts or raises by a mere turn of the handwheels. The degree of tilt is easily visible with a long calibrated scale. Convenient locking knob for tilt. The saw arbor is equipped with sealed-for-life ball bearings. An improved motor mount tilts with the arbor and provides better belt adjustment. This prevents belt twist and unnecessary wear. Table Extensions, Blades and Accessories listed on Page 5.

## S P E C I F I C A T I O N S

Depth of Cut.....	2½"

Splitter equipped with two independent pawls. Motor mounts directly on machine. Two sealed-for-life ball bearings. Equipped with Combination Blade, Rip Fence, Mitre Gauge, Saw Guard, V-Belt, and 5" Motor Pulley. Less motor.

# 8" TILTING TABLE BENCH SAW

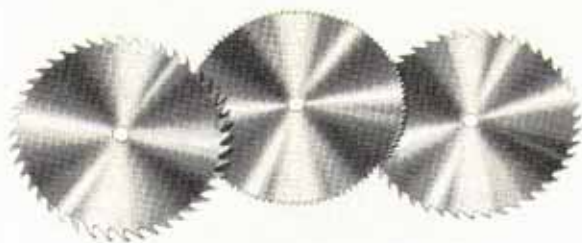

For fast, accurate sawing with professional results the SHOPMASTER 8" Tilting Table Bench Saw (CS-100) is ideal. It will do all types of straight sawing, cuts up to 2 $\frac{1}{4}$ " thick stock. Equipped with combination blade for ripping and cross cutting, rip fence for ripping lumber, mitre gauge for cross cutting and angle cuts, plus blade guard. Table tilts to full 45° with easily read scale for adjusting angles. This saw is built for long wear with all kinds of sawing. It is rugged and tough, and can really do a production job. Some of its outstanding features are: Sealed-for-life ball bearings, a fast acting lifting arbor, free swinging trunnions, built-in sawdust blower, and adjustable motor pulley to keep constant belt tension. This saw is easy to mount and use.

# CIRCLE SAW ACCESSORIES

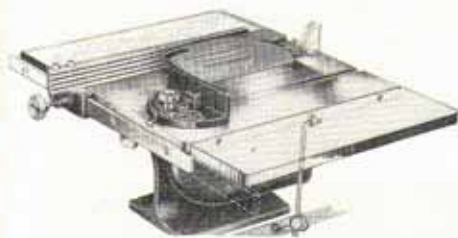

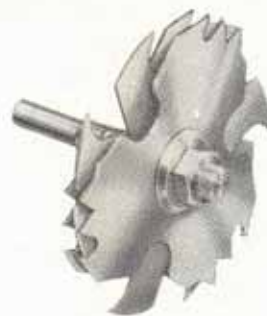

**SHOPMASTER Saw Blades.** Manufactured of highest quality steel. Scientifically heat treated and hand peened. Set with the correct tooth shape for faster, cleaner sawing. Have a spare blade on hand for your saw. It will save time should you hit a nail or dull your present blade.

Y-126	8" Combination Blade
Y-127	8" Cross Cut Blade
Y-128	8" Rip Saw Blade
Y-129	8" Hollow Ground Comb. Blade
Y-1226	10" Combination Blade
Y-1227	10" Cross Cut Blade
Y-1228	10" Rip Saw Blade
Y-1229	10" Hollow Ground Comb. Blade

**DADO SETS** for cutting grooves. Made of the same fine steel as the SHOPMASTER Saw Blades. Two styles to choose from. Both have  $\frac{5}{8}$ " bore to fit most standard saws. "A" Set (Y-136) for the average shop. "B" Set (Y-137) for more precise work, and for industrial users.

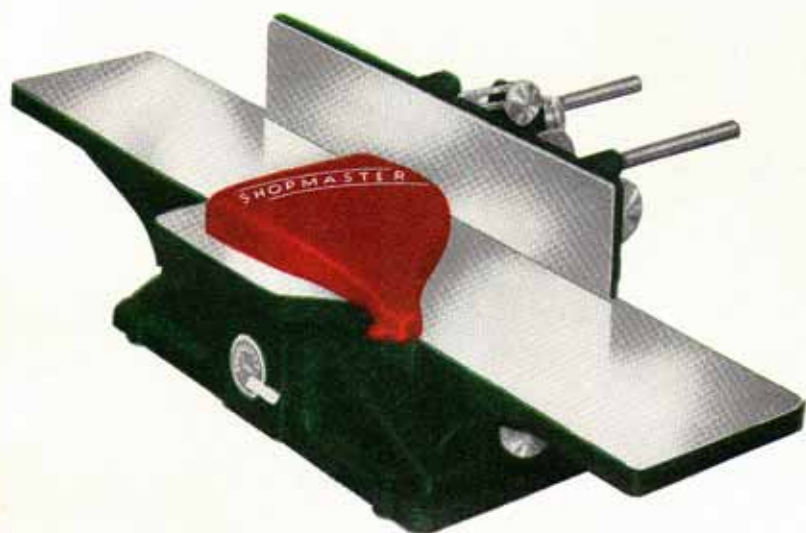

Get greater working surface on your saw with table extensions—one for each side of saw—make sawing easier. Complete with bolts, ready to attach to table. Table Extensions (TE-110) for SHOPMASTER 8" Tilting Table Saw, includes long rip fence track, and adjustable table support rod.

Extensions for 8" Tilting Arbor Saw (TE-910). Includes bolts for mounting and long rip fence track.

# 6" BALL BEARING JOINTER-PLANER

Save yourself that work of hand-planing with a SHOPMASTER 6" ball bearing Jointer (JO-400). This Jointer has the most advanced cutting head of any jointer. Knives can be easily set to perfect adjustment, by turning adjusting screws. Both tables move for ease of alignment. Tables are 17" long to take large work and will surface up to 6" wide with  $\frac{1}{2}$ " cut. Fence is positively locked in the center to prevent twist and will tilt to 45 degrees. Knives are made of finest high speed steel for long life. Never before has so much attention been given to capacity and performance on this type of equipment.

Specially designed guard gives maximum protection at all positions. Guard easily removed.

On 1750 RPM motor, 5" pulley will revolve head at 4325 RPM (recommended).  
Comes complete as illustrated, less motor. Packaged Weight, 48 lbs.

# JOINTER AND DRILL PRESS ACCESSORIES

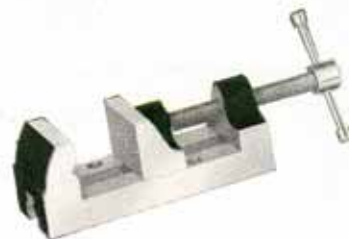

SHOPMASTER Jointer Knives are made of finest high-speed steel-ground and honed to a keen cutting edge. These knives will give long service and retain cutting edge longer than most knives. Sold in sets of 3, 6" long (Y-421).

Do surfacing work on your Drill Press with this SHOPMASTER Drill Press Planer (PL-670). Rotary cutter has three knives. Does smooth, accurate planing. Housing holds work to table, protects operator and deflects chips. This speedy planer will pay for itself in a short time.

Hold work securely on your Drill Press and do more accurate work. This heavy vise has accurately cut Acme thread (square thread) instead of the conventional V-thread. Vise opens three inches. Drill Press Vise (VS-80).

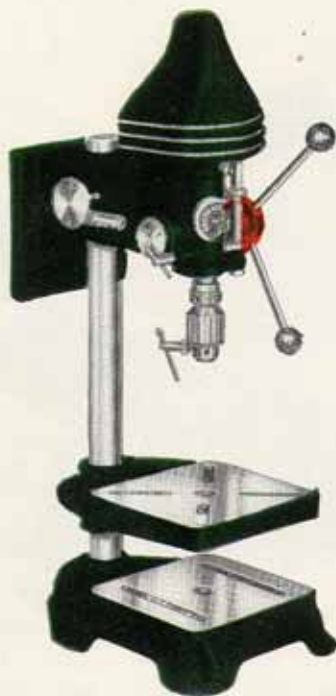

Routing and fluting can be easily done with a SHOPMASTER Router Kit (RK-685). Kit contains router adapter, plus four 1/2" shank double fluted router bits, 3/16", 1/4", 3/8", 1/2". Router bits or adapters can be purchased separately.

This 5 1/2" Rubber Sanding Disc (Y-635A) for Drill Press or Electric Drill can either be chucked on tool or threaded on any 1/2"-20 Threaded Shaft. Complete with one sheet of garnet paper. Extra sheets of self-gluing paper sold two sheets glued back-to-back (Y-636A).

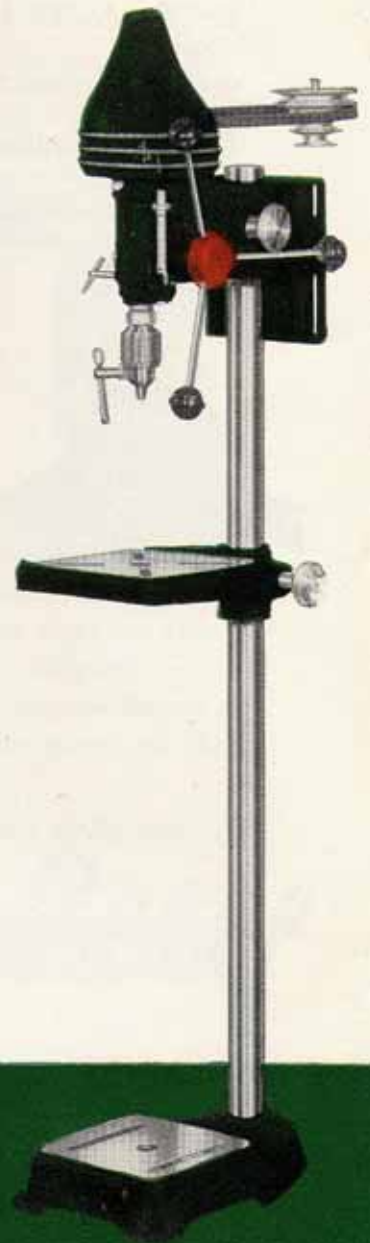

# 12" FLOOR AND BENCH DRILL PRESS

SHOPMASTER 12" Drill Presses. Two models to choose from. Bench Model (DP-600), and the Floor Model (DP-600F). In addition to drilling holes in wood and metal it can be converted to cut square holes for mortise joints with a mortising attachment. The Shaper Attachment with the various cutters will cut all types of mouldings and curved edges. Sanding Drum for all types of sanding. Both models are equipped with Jacobs Chucks, three-spoke feed wheel, centerless ground seamless steel column, ground table, and base for complete accuracy. The SHOPMASTER Drill Press is the tool that "rounds out" every shop, large or small.

## SPECIFICATIONS

	Bench Model	Floor Model
Table Size . . . . .	7½" x 7½"	7½" x 7½"
Base to Chuck . . . . .	11⅝"	45⅝"
Table to Chuck . . . . .	8½"	42½"

Recommended Motor . . . . .	¼ or ⅓ HP	¼ or ⅓ HP
Speed of Chuck . . . . .	700-4250 RPM	700-4250 RPM
Packaged Weight	51 lbs.	57 lbs.

Comes complete as illustrated, less motor., with Jacobs Chuck ½" (#33) Ball Thrust Bearing, And Depth Indicator.

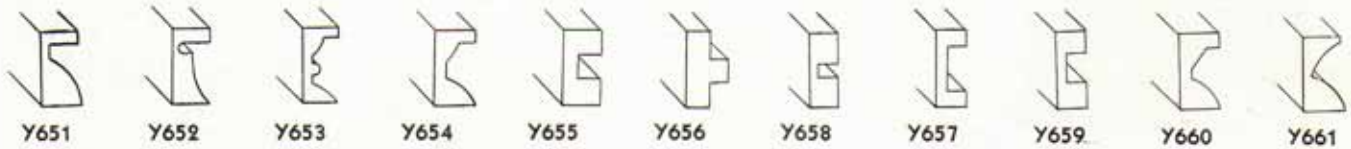

# DRILL PRESS ACCESSORIES

Drill square holes with your Drill Press. This Mortising Kit (MK-610) can be quickly mounted on your drill press and ready to use. Kit consists of fence and hold-down to hold work securely to table, chisel adapter, chisel, and bit. Kit includes  $\frac{3}{8}$ " chisel and bit. However,  $\frac{1}{4}$ " or  $\frac{1}{2}$ " chisels and bits may be ordered.

Convert your Drill Press into a shaper. This Shaper Kit (SK-660) will permit you to run mouldings and curved edges easily. Kit contains shaper adapter, and table bearing to prevent chatter and give very smooth work, plus three most popular cutters. Cutters are of three-wing type with  $\frac{1}{2}$ " hole. Other cutters available as illustrated.

**SHOPMASTER Shaper Collars (SC-655).** This set of ten collars graduated in 16ths from  $\frac{7}{8}$ " to  $1\frac{7}{16}$ " have  $\frac{1}{2}$ " centers. To be used in place of fence while cutting irregular shapes, such as table tops, etc.

**Drill Press Column Collars (DP-640).**

These collars fit under head or table of Drill Press and permit head or table to swing freely.

Sanding is still another job your Drill Press can do. **SHOPMASTER Sanding Drum (SD-640)** is a rubber sleeve drum that will chuck into drill press. This drum is 2" in diameter and 2" high and complete with one sanding sleeve. Additional sleeves may be purchased. Packed six to a package (Y-630A).

# 12" TILTING TABLE BAND SAW

SHOPMASTER 12" Band Saw (SB-200) is almost a complete shop in itself. It will crosscut and rip lumber, as well as make involved curved or circular cuts. Ball bearing wheels and hardened steel thrust guides give long life and complete dependability. Wheels are rubber tired and dynamically balanced. Table tilts to 45° and has mitre gauge slot, and is drilled for rip fence. Blade is protected with guard which is adjustable to allow cuts up to 6<sup>1</sup>/<sub>8</sub>" thick. All mechanism is fully enclosed with easily removed wheel covers. Upper wheel is adjustable both for tension and tilt. This saw is the ideal tool for all shops.

Complete as illustrated, less motor. Shipping Weight, 59 lbs.

# BAND SAW ACCESSORIES

Have an extra Band Saw Blade on hand. SHOPMASTER Blades are manufactured of finest steel to give long life, and are properly set and sharpened for smooth clean cutting. Blades are individually packed and are 78" long. There are four sizes:

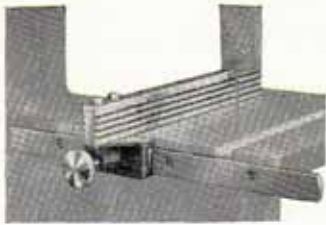

1/8" Band Saw Blade (SB207-1)

1/4" Band Saw Blade (SB207-2)

3/8" Band Saw Blade (SB207-3)

1/2" Band Saw Blade (SB207-4)

Special length blades are available for other makes of saws.

A Band Saw Rip Fence (SB250A) can be easily attached to your saw and will greatly increase the work you can do. It permits ripping lumber more quickly and accurately.

SHOPMASTER Mitre Gauge (CS-124A) will add convenience to your Band Saw. Cuts angles with accuracy. Calibrated to 60° each way.

Cut circles on your saw with ease. SHOPMASTER Band Saw Circle Cutting Attachment (CA-210) clamps on upper guide bar. Pivot pin is adjustable. Will cut circles from 2" to 10" diameter.

# BELT AND DISC SANDER

Eliminate tedious hand sanding. SHOPMASTER Belt and Disc Sander (SR-1000) will sand all kinds of shapes and sizes of material—wood, metal, and plastic. Belt is adjustable to both horizontal and vertical positions. Guard and disc can be removed so large flat surfaces can be sanded. A special feature is the exposed cylinder on the end of the belt for sanding curved surfaces and odd shapes. Table will tilt 45° on both disc and belt. Disc is of heavy cast construction, mounted on sealed-for-life ball bearings, for true running. Belt is 6" wide, 48" long, and belt support table is a heavy casting. Disc size is 10" diameter. Every shop should have a sander.

# SANDER ACCESSORIES

**MITRE GAUGE (CS-124A).** Increases accuracy of edging operations and essential where duplicate pieces are being made. Can be used with both disc and belt. Graduated scale and locking knob permit accurate setting for any angle up to 60°.

**BELT FENCE (SR-1050A).** Permits accurate edging of long boards. Quickly attached and removed. Face is precision machined. Fence is adjustable to many positions and can be tilted 45°.

Sanding Belts 6" wide, 48" long, may be purchased in various grits. Garnet belt for wood, and aluminum oxide for wood, metal, and plastic. (Y-1021 Aluminum Oxide 6" x 48" Endless Belt, medium grit.)

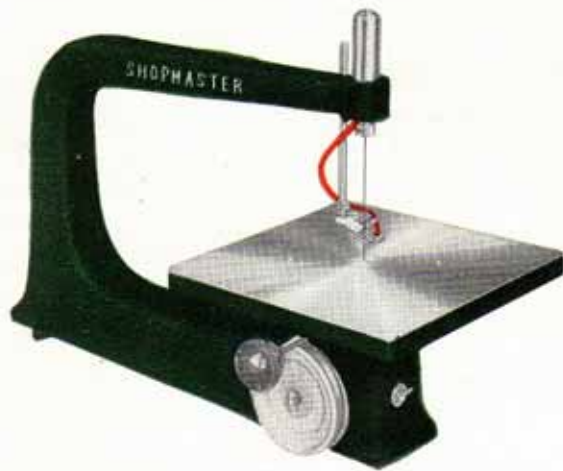

Sanding Discs for SHOPMASTER Sander are 10" in diameter. Discs are fine, medium and coarse garnet, or aluminum oxide. Discs are easy to change. Use SHOPMASTER adhesive. (10" Medium Grit Aluminum Oxide Disc Y1041.)

**DISC ADHESIVE (Y-1005).** Compounded to hold sanding paper securely on disc. Yet paper is easily removed when desired. Merely apply to both disc and paper and then press together. Sold in 1/2 pint cans.

# 15" TILTING TABLE JIG SCROLL SAW

The simplicity of operation and outstanding performance of the SHOPMASTER Jig Saw (JS-300) makes this tool ideal for both the amateur and professional woodworker. Accuracy is insured by especially rugged construction. Base and frame are cast in one piece. The extra large table is precision machined and tilts 45°. A quick acting table lock makes changing angles easy and fast. Bearings and mechanism are encased in oil. All controls are easily accessible on the SHOPMASTER Jig Saw. Hardened steel blade support and a spring steel tension foot make sawing easier. An efficient blower insures visibility. A simple set screw arrangement permits easy blade changing. See this saw at your dealer today and get started in this fascinating woodworking hobby.

## S P E C I F I C A T I O N S

# JIG SAW ACCESSORIES

SHOPMASTER Jig Saw Blades are manufactured of finest steel for long wear. They come in seven sizes for all types of sawing. Generally speaking, the finer the blade, the finer the work. Packaged six to an envelope.

Stock No.	Thickness	Width	Teeth Per Inch
Y-331	.020	.110	20
Y-332	.020	.110	15
Y-333	.020	.110	10
Y-334	.028	.187	10
Y-335	.028	.250	20
Y-336	.028	.250	7
Y-337	.016	.054	20

SHOPMASTER Jig Saw Files (Y-730A). These files will do all kinds of filing in hard-to-get-at places. Files chuck into lower chuck and cut on down stroke. A file for every type of cut. Twelve files to a set. Packed in plastic box.

Sand hard-to-get-at places with SHOPMASTER Jig Saw Sander (SD-710). Wrap with any grit paper. Chuck into lower chuck. This handy accessory will save time in sanding irregular shapes.

Now you can easily cut true circles on your Jig Saw. The SHOPMASTER Jig Saw Circle Cutting Attachment (CA-310) mounts on saw quickly and will cut true circles from 2" to 10" in diameter.

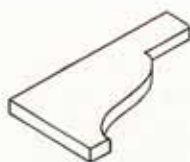

# SABER SAW

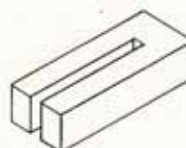

The SHOPMASTER Saber Saw is the simplest of all tools to operate. The simplicity of this tool, plus the ease with which it can be used, makes it ideal for the professional as well as the youngest woodworker in the family. This versatile tool can be used in a great variety of work, from straight sawing to complicated internal cutting. The entirely new design of this saw permits cutting of stock up to 1½" thick, and there is no limit to size of the piece that can be sawn. The saw is designed with no arm above the table so large panels can be easily cut. The table tilts to any angle up to the full 45°, and can be quickly adjusted to the desired angle with the quick-action table lock. This versatile little saw will do a great variety of work, as illustrated. (SS700)

## SPECIFICATIONS

Mortise joints

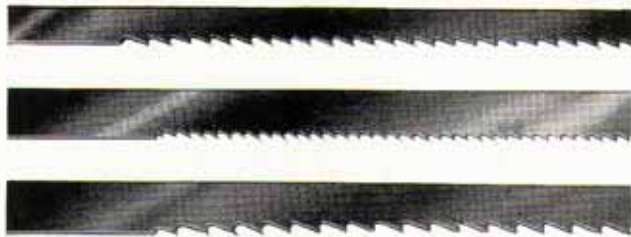

Both internal and external bevel cuts

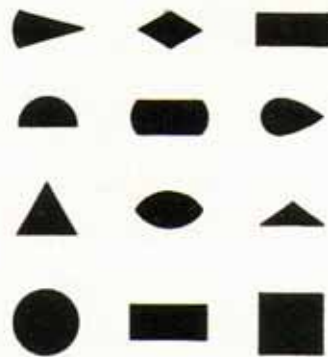

# SABER SAW ACCESSORIES

SHOPMASTER Saber Saw Blades are manufactured of oil tempered steel. They are tough and durable and will stand a lot of wear. They are sharpened to cut on the down stroke so work will not lift from table.

Stock No.	Thickness	Width	Teeth Per Inch
Y-723	.027	.187	10
Y-722	.027	.25	20
Y-721	.027	.187	7

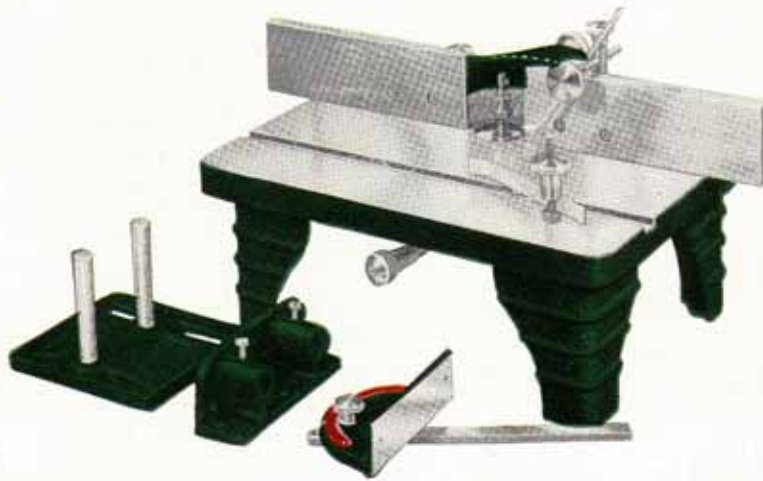

SABER SAW FILES (Y-730A). Twelve shapes of files packed in a convenient plastic box. These files are machined to cut on the down stroke, so work is not lifted from saw table. There is a file shape for all filing needs.

SABER SAW SANDING DRUM (SD-710). This convenient sanding attachment is easy to chuck into your Saber Saw. Sands irregular shapes easily. Wrap with any grit sandpaper, garnet paper, or emery cloth for all types of work.

# SPINDLE SHAPER

Cut your own mouldings and edges with this SHOPMASTER Spindle Shaper (SP-800). Quick adjusting and locking spindle, with two sealed-for-life ball bearings. This rugged Shaper will do all types of work and is a real production tool. Fence has a micro-adjusting screw so fences can be quickly adjusted and set. Spindle travels 1" up and down, so any type cut can be made. Standard  $\frac{1}{2}$ " bore, three-wing cutters are available in a variety of shapes. A shaper in your SHOPMASTER Shop will brand your projects with the professional touch.

SHAPER COLLARS (SC-655) for use on irregular shaped items. For use where it is impossible to use regular fence. Ten to a set from  $\frac{7}{8}$ " to  $1\frac{1}{16}$ " graduated in  $\frac{1}{16}$ " to make all depths of cuts. These collars are a must for all shaper users.

# 10" WOOD TURNING LATHE

A tool of hundreds of uses is the SHOPMASTER Lathe (L-500). The long base (31" between centers) and large swing (10") makes possible all types of turning. The headstock has two sealed-for-life ball bearings and has a four-step built-in pulley for a great variety of speeds. Both ends of headstock spindle are threaded to take the six inch face plate furnished. Centers of headstock and tailstock are #1 Morse Tapers, for true running, and ease of change. Tailstock is easily adjusted for any length turning (No Wrenches Are Necessary). This tool is equipped with centers, 6" face plate, V-belt, and four-step motor pulley. A Lathe is one of the most interesting tools in a woodworking shop. Buy this Lathe and complete your shop.

## S P E C I F I C A T I O N S

Comes complete as illustrated, less motor. Packaged Weight, 40 lbs.

# LATHE ACCESSORIES

SHOPMASTER Lathe Tools are sold in two sets. The professional set of eight tools (Y-520A), and the standard set of five tools (Y-540A). Both sets have long hardwood handles and fine steel blades carefully tempered to take and hold a keen cutting edge.

SHOPMASTER Screw Center (LC-510) is designed to hold small turnings, which would be impossible to hold any other way. No costly screw to replace, as this center will use any #10 wood screw. Can be used on any lathe with #1 Morse Taper Head stock.

You need this chuck for your lathe. SHOPMASTER 4-Jaw Lathe Chuck (Y-511). This fine chuck with hardened steel jaws will hold all types of irregular items. Chuck threads on inboard end of lathe spindle, and will fit any  $\frac{3}{4}$ " diameter 16 thread lathe.

SHOPMASTER Lathe face plates 4" (FP-530), 6" (L-507), and 8" (FP-531). Each is threaded both right and left hand thread for both inboard and outboard turning. Face plates do double duty if faced with sandpaper. They make excellent sanding discs.

A double post tool rest (TR-520) will save time with long turnings. This tool rest is 14" long and has a ground face so lathe tools will work freely.

Your lathe will become a horizontal drill press with this combination a #1—#33 taper arbor (Y-520), plus a Jacobs Chuck (Y-610). Can be used in headstock or where work is turning, use in tailstock. Will do a variety of work, drilling, reaming, etc. Either part can be purchased separately. You can use your drill press chuck with this taper arbor.

# 7" TILTING ARBOR BENCH SAW

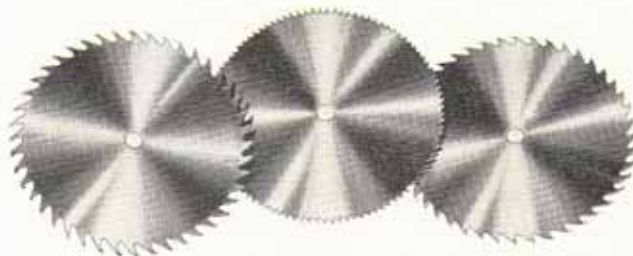

A new smaller saw for the home workshop enthusiast on a limited budget, and for the smaller shop where space is a factor, this saw is ideal. Saw table is smaller, but the depth of cut is full 2 $\frac{1}{8}$ ". Saw blade tilts to 45°. The table always remains level. Saw arbor runs on two sealed-for-life ball bearings. This saw is complete, less motor with 7" combination blade, rip fence, mitre gauge, and saw guard. (TA-1300)

Table Extensions Available.

and Saw Guard.

SHOPMASTER 7" Saw Blades are manufactured from the same high quality steel as all other SHOPMASTER Blades. Teeth are gummed, filed, and set to cut smoothly and easily.

# 4" JOINTER-PLANER

Most of the fun of a homeshop is doing smooth, nice work. A Jointer will save tedious hand planing, and speed up your projects. There is no sacrifice in quality in this new jointer. It is built to SHOPMASTER'S same high standard of workmanship. Cutter head is mounted on sealed-for-life ball bearings and is equipped with three high-speed steel knives, sharpened and honed for precision work. Both tables are adjustable for all types of work. Fence tilts and has accurate scale for setting. Guard may be removed for cutting rabbets to a depth of  $\frac{3}{8}$ ". This tool will plane boards up to 4" wide faster and easier than by hand. Buy this tool and save time and energy. (JO-1500)

Have an extra set of knives for your jointer. You'll save time should your present knives get nicked or dull. Knives are manufactured from highest grade high speed steel, ground and honed to a keen edge to give smooth work and long wear. Sold in sets of three. (Y-1521)

## SPECIFICATIONS

# 10" BAND SAW

You'll be amazed at the type and quality of work you can do with this saw. Nearly every type of sawing can be done with a Band Saw. Cross cutting, ripping, and involved curved cuts. In addition to wood, metal and plastic can be sawn. This saw will cut to the center of a 20" circle, and will cut stock up to 5" thick. When you start your shop, be sure to see this SHOP-MASTER Band Saw. (SB-1400)

## SPECIFICATIONS

A Mitre Gauge (TA-1305A) will greatly simplify your cross cutting with this saw. Gauge fits in groove in saw table.

Band Saw Blades for your SHOP-MASTER Band Saw are manufactured of high grade steel. There are four sizes available—1/8", 1/4", 3/8", 1/2".

Straight fast ripping is easy with a Band Saw Rip Fence. The Rip Fence Track bolts onto the front edge of saw table.

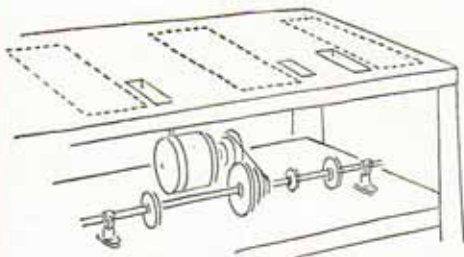

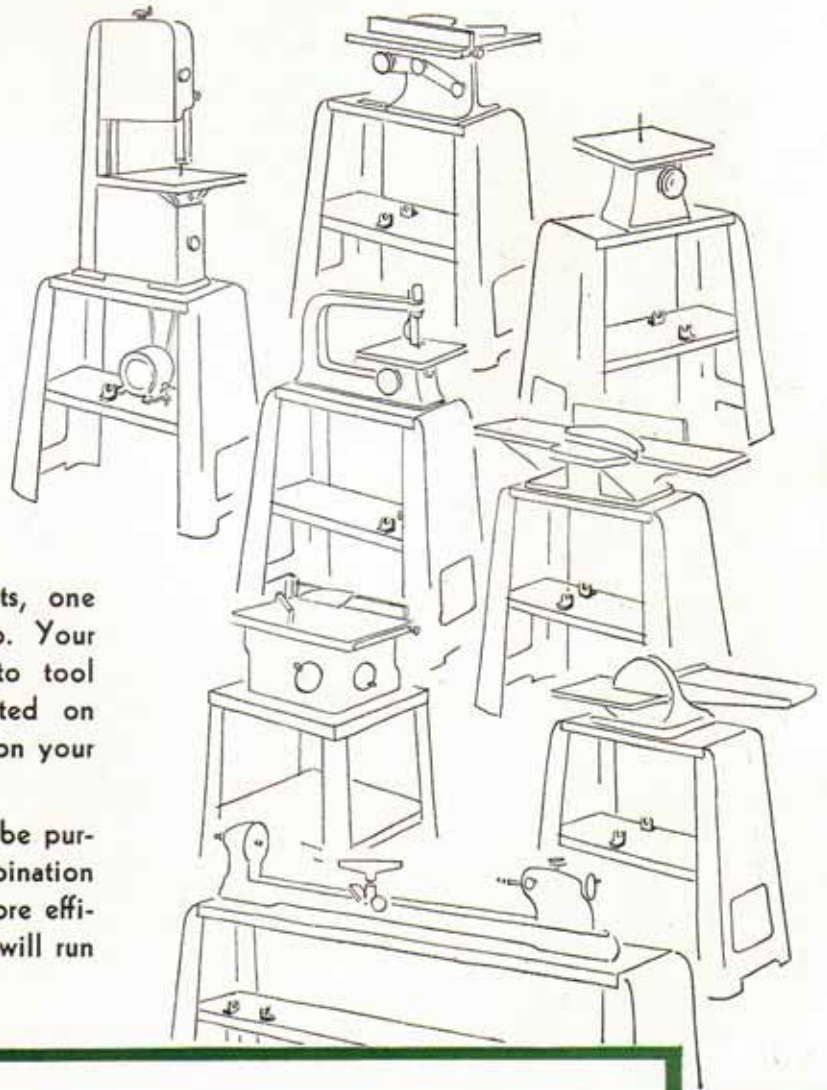

# POWER YOUR SHOP WITH ONE MOTOR

With SHOPMASTER motor mounts, one motor will power your entire shop. Your motor can be moved from tool to tool quickly and easily, whether mounted on SHOPMASTER Stands or mounted on your own stands.

This individual tool arrangement can be purchased more reasonably than a combination machine and is more versatile and more efficient. A  $\frac{1}{2}$  HP double shaft motor will run your entire shop.

An alternate method of running more than one tool with one motor is with a Jack Shaft Kit. Tools can be mounted in line on a table or bench as illustrated. This makes an economical and simple installation.

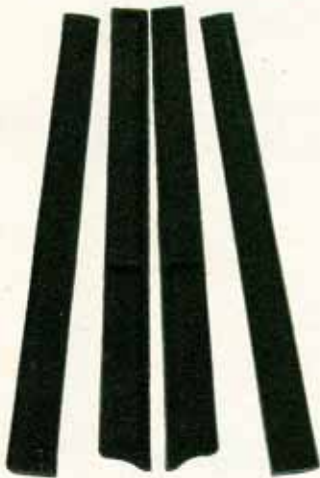

MOTOR MOUNTS ARE ILLUSTRATED ON PAGE 27.

# SHOPMASTER ADJUSTABLE STANDS

An ideal mounting for SHOPMASTER Tools is the DeLuxe Model Stand. This stand with its sturdy cast ends and heavy wood top and shelf makes a strong and sturdy tool mount. This stand is 28 $\frac{1}{4}$ " high, the proper height for best work. These stands can be bolted to the floor, or for the small shop they are easily movable.

DeLuxe Stand (TS-53A) has 21" long top.  
DeLuxe Lathe Stand (TS-55A) has a 48" top.

Do you need a larger stand or bench? The Master Model Steel Legs (TS-60) are sold in sets of four and can be assembled as you wish to any size. These legs make a strong sturdy base for mounting more than one tool, as illustrated on Page 25.

Legs are 27 $\frac{3}{4}$ " high with brackets for bolting to the floor and also shelf brackets.

# ACCESSORIES

SHOPMASTER Motor Mounts make it possible to use one motor on more than one tool. Motors can be easily lifted and moved from tool to tool. There are two styles of motor mounts—DeLuxe Model Mount (MB-70) includes rear motor support. Master Model Mount (MB-75) is a free hanging mount. Extra clips (MB-72A) for both mounts can be purchased separately in pairs. Mounts include bolts and mounting wood screws.

For fine work, a good light is necessary. SHOPMASTER Tool Light (Y-5100) can be mounted and moved readily to give the best light. Cord shaft is flexible, so it can be easily adjusted; vibration will not jar it loose.

Polishing, grinding, buffing, sanding, sharpening, can all be done on this SHOPMASTER Polishing Head (PH-1100). Any attachment with  $\frac{1}{2}$ " arbor hole can be used. This tool will give long service and make many hard jobs easier and faster.

A SHOPMASTER Jack Shaft Kit (Y-2010A) will run two or more tools with one motor as illustrated on Page 25. Shaft is 2' long, and mounted between two self adjusting bearings. Two 4-step pulleys are included to give a wide range of speeds, plus a 2" pulley. Shafts can be coupled together to give greater lengths.

# BUILD IT Yourself

## WITH SHOPMASTER PLANS

Build extra items for your home with these detailed plans. It's easy. Most plans are full size and can be traced directly on the wood. Full directions are given with each plan. In the case of the Briar Pipes, each step is pictured, with an explanation of each picture. You will be amazed at the things you can do with these simple plans.

No. 53

This child's wagon is easy to build. Odds and ends of lumber can be used to advantage. It will give the children hours of pleasure.....25c

No. 67

Various styles of fences are illustrated in this plan. These drawings will give you ideas to beautify your property.....25c

No. 62

This Bird House is easy to build. The plan gives the standard size holes for most birds.....25c

No. 65

Turn out your own pipes. This fully illustrated plan gives step-by-step pictures of the whole process. Make them for yourself or sell them to your friends.....50c

No. 70

This interesting five-in-one Coffee Table is really one large table with four nested tables underneath. Ideal for parties as each person can have his own individual table.....50c

No. 58

This amusing Bouncing Dog will please the small child. The toy bobs up and down as it is pulled.....25c

No. 54

A Coaster Set is always useful. Prevents drinks from leaving rings on furniture. Especially useful during summer months for iced tea, lemonade, etc.....25c

No. 69

A sturdy comfortable Lawn Chair will be a pleasant addition to your lawn. Can be built with legs, or for ease of moving, with wheels.....50c

No. 68

A new modern coffee table. Very easy to build. Really requires only three pieces. Fits beautifully with any type of furniture. Can be folded and stored away.....50c

No. 56

Make one of these Broom Holders and have a place to hang your broom. It will keep the broom from underfoot and keep it out of the way.....25c

No. 71

Build this attractive Picnic Table for your lawn or porch. Enjoy your meals outside this summer.....25c

No. 57

This clever Tie Rack will hold ties and add a decorative touch. Very easy to trace and cut this novelty with SHOPMASTER tools.....25c

No. 64

A Kiddie Car is a toy every child wants. Why not build one yourself. Easy to build from odds and ends of lumber.....25c

No. 52

Build this silver chest for the little woman. She probably has always wanted one. Easy to build with SHOPMASTER plans.....25c

No. 72

This Roller Toy will help the baby learn to walk. The cage of the toy revolves as the toy is pushed. Easy to build.....25c

No. 73

You can build this full sized Baby's Crib. It takes a standard 27"x52" crib mattress. All directions simple to follow.....25c

No. 59

This wooden pull-toy will please the youngsters. The whole train is simple to construct. Nearly any type of scrap wood can be used.....25c

No. 51

Turn this beautiful Nut Bowl on your lathe. Plan includes steps and directions for Bowl and Mallet.....25c

This is another child's toy that will tickle the youngster. Small cart will carry other toys. Duck's wings flap up and down.....25c

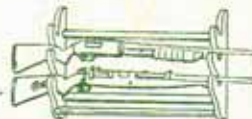

No. 55

Take some of that energy out of your youngster with this hobby horse. Full sized pattern of head is simple to trace.....25c

No. 63

Build a Gun Rack for your den. This rack will hold three guns. It also has a shelf for trophies or shells.....25c

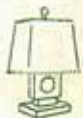

No. 74

This modern Table Lamp will make a beautiful addition to your home. It's completely built of wood except the electrical fixture. It's such a striking lamp you will want to build a pair of them.....50c

The Kids will love having their own table and chairs. As many chairs as necessary can be built.....25c

No. 66

This full sized child's play pen is just the thing to keep the baby out of mischief. Pen is raised to keep child from drafts.....25c

No. 75

# BUILD IT Yourself

## WITH SHOPMASTER PLANS

Build extra items for your home with these detailed plans. It's easy. Most plans are full size and can be traced directly on the wood. Full directions are given with each plan. In the case of the Briar Pipes, each step is pictured, with an explanation of each picture. You will be amazed at the things you can do with these simple plans.

**No. 53**  
This child's wagon is easy to build. Odds and ends of lumber can be used to advantage. It will give the children hours of pleasure.....25c

**No. 67**  
Various styles of fences are illustrated in this plan. These drawings will give you ideas to beautify your property.....25c

**No. 62**  
This Bird House is easy to build. The plan gives the standard size holes for most birds.....25c

**No. 65**  
Turn out your own pipes. This fully illustrated plan gives step-by-step pictures of the whole process. Make them for yourself or sell them to your friends.....50c

**No. 70**  
This interesting five-in-one Coffee Table is really one large table with four nested tables underneath. Ideal for parties as each person can have his own individual table.....50c

**No. 58**  
This amusing Bouncing Dog will please the small child. The toy bobs up and down as it is pulled.....25c

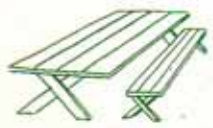

**No. 54**  
A Coaster Set is always useful. Prevents drinks from leaving rings on furniture. Especially useful during summer months for iced tea, lemonade, etc.....25c

**No. 69**  
A sturdy comfortable Lawn Chair will be a pleasant addition to your lawn. Can be built with legs, or for ease of moving, with wheels.....50c

**No. 68**  
A new modern coffee table. Very easy to build. Really requires only three pieces. Fits beautifully with any type of furniture. Can be folded and stored away.....50c

**No. 56**  
Make one of these Broom Holders and have a place to hang your broom. It will keep the broom from underfoot and keep it out of the way.....25c

**No. 59**
